

Ciba is a leading global company dedicated to producing high-value effects for its customers' products. We create effects that improve the quality of life enhancing the performance, look and feel of finished goods. We also endeavor to be an excellent place to work, offering interesting, challenging assignments and the chance to develop a rewarding career.

Postdoc - OLED Application Research

A postdoc job provides an ideal career launch pad. With their limited duration, these jobs provide a great opportunity to get to know our multifaceted company and experience our corporate culture. As you already have your graduate qualifications, you will be entrusted with challenging tasks from the outset. Since much of your work will involve collaborating with other departments, you will become familiar with various areas of Ciba Inc.

Tasks

Within the OLED application group, the incumbent will constantly work in a team, being responsible for independent project sub-tasks, work packages and results. Further tasks are to design, execute and interpret application tests on the basis of scientific knowledge in the field. The Postdoc will also study patent literature and scientific articles in order to strengthen the internal OLED know-how.

Profile

The ideal candidate should possess sound scientific knowledge of the most important OLED deposition technologies and of the materials involved. Furthermore, he/she should have developed during his PhD a solid hands-on experience in OLED device preparation, materials characterization and processing.

He/she should be a flexible individual, able to adapt to a multicultural environment (working language: English), in which team work, multitasking, problem solving and strong commitment to deliver results on time are the key factors to achieve a successful performance. Presentation skills and computer literacy complete the profile.

Interested candidates are encouraged to submit their Curriculum Vitae along with a recent picture, the list of publications, the intended starting date and two reference contacts.

Site: Ciba Inc., Basel

Start date: As soon as possible

Duration: 1 year

Date of publication: October 30th 2008
